index.php — Check session status ⇒ pass on to desired page or login

login.php — Checks session status ⇒ pass on or perform login
⇒ accountsecurity.php ⇒ Force password change / info update?

home.php — Main landing page

register.php — Handles ENTIRE registration process. ~~self~~ posts a lot. | Not payment, but does do receipt to submit.php

submit.php — Handles incoming registration data. Saves to $_SESSION redirects

pay.php — Lists due invoices; Accepts CC and voucher info; self-posts; redirects to receipt page

~~redeem.php — Processes voucher redemption~~

gift.php — Allows creation of vouchers - passes to pay.php and gets links

donate.php — Takes donations and CC info directly; self-posts | then activates

message.php — Allows sending of messages to qualified registrants.

account.php — set account and self-profile details; Also slave profiles

pmote.php — Give a slave profile an account; Break slave option

confirm.php — Confirm accounts (layout) | home.php links?

newuser.php — New user

printable form.php — For those w/o a CC

Main search function ⇒ Accounts, profiles, events, owners, registrations, vouchers...
